NSH営業一課

EV充電站相關情報-發展態勢

EV車充電柱發展狀況

2010年内全国27都会で充電スタンド75ヶ所建設、AC充電柱合計6209本。2015年迄全国で充電スタンド4000ヶ所、2020年迄10000ヶ所保有させる計画。

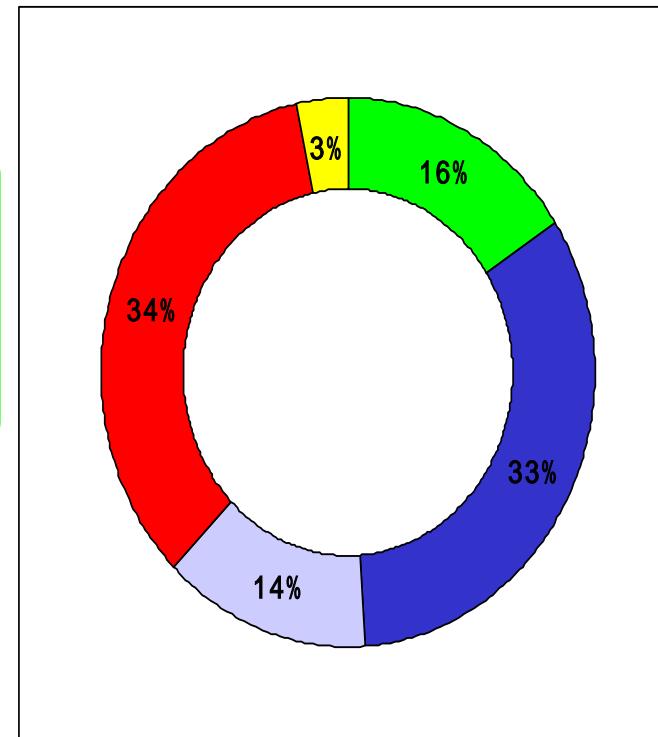

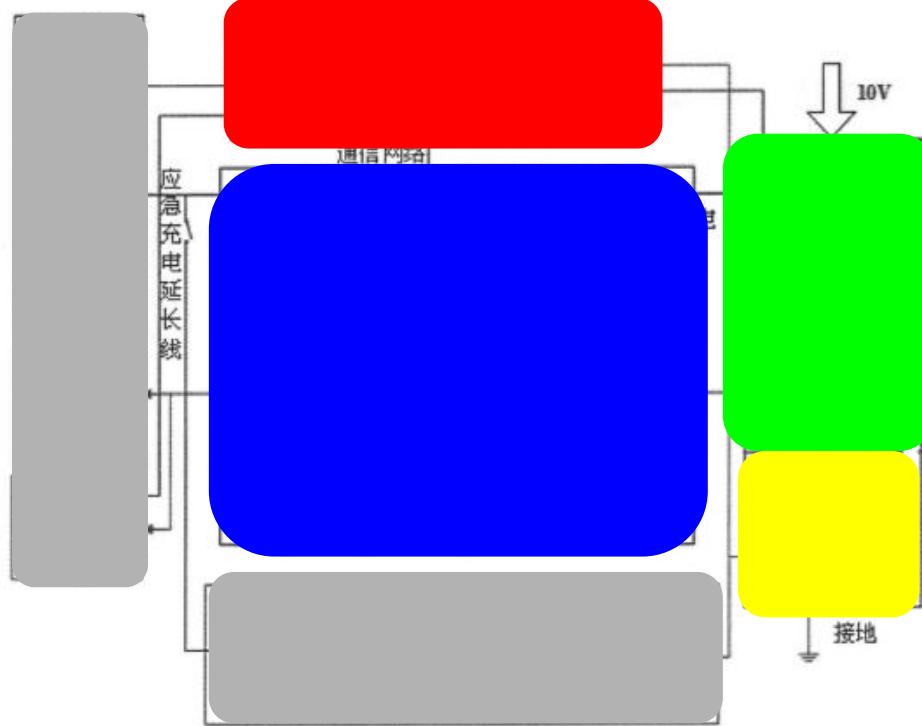

EV充電站相關情報-構成單元

EV車充電站的構成單元：配電系統、充電系統、電池調整系統、監督管理系統

EV車充電的3種類型：普通充電模式、高速充電模式、電池交換模式

需要設備一覽：充電設備、高次諧波濾波器、變壓器、配電裝置、開閉電源等

面向EV車顧客的尼吉康新制品-急速充電系統

nichicon

High/regular speed charging station for electric vehicles

Next-generation clean energy system that is enabling energy generation and storage

Solar Power → **Reliable power storage** → **Any time High/regular speed charging**

Characteristics

- Capable of charging an electric vehicle at high speed even by solar power only
- Capable of charging three cars at the same time: one at high speed and two at regular speed

Charging unit and **High/regular speed charging station** shown with a white electric car.

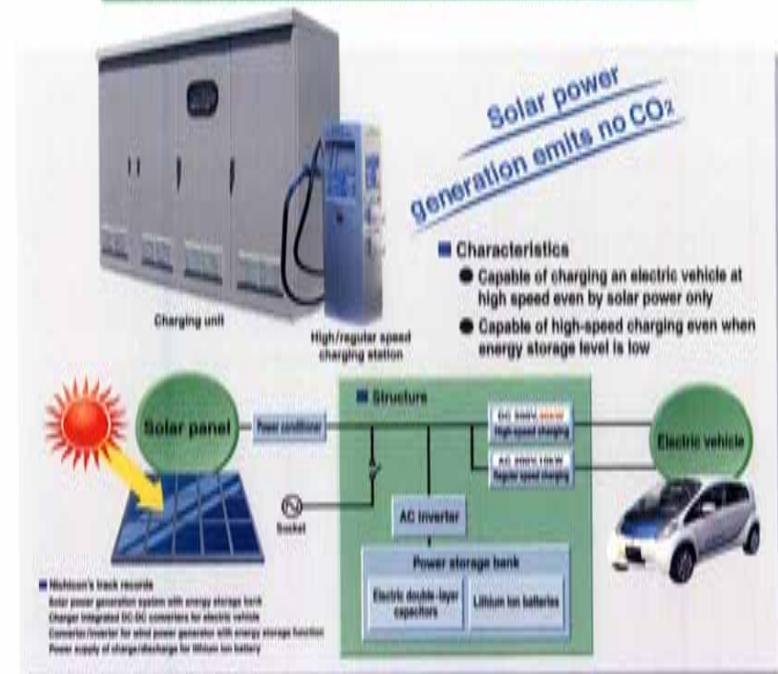

Straightforward solution for electric vehicle charging with solar power generation!

- Charging is unstable and takes a long time
- Want to charge multiple cars at one time
- Life of conventional type energy storage bank is too short
- Stable power supply thanks to energy storage function!
- Three cars can be charged at the same time - one at high speed and two at regular speed!
- Combined usage of lithium ion batteries and electric double-layer capacitors allows very fast responses and long life!

一体型タイプ
オールインワンパッケージの省スペースタイプ
NQC-A301

スタンドタイプ
設置場所を選びないスタンドと本体のセパレートタイプ
NQC-A301S

設置場所に応じて一体型タイプとスタンドタイプから選定できます。

概要

対応可能な市販済み 電気自動車の車名	急速充電器の主な仕様	その他安全対応 などの特徴
i-MiEV スバル プラグイン ステラ	入力 AC200V±15% 三相50/60Hz 出力 DC50~500V 0~75A 30kW	漏電検出保護 地絡検出保護 加熱保護

実績 i-MiEVに車載用充電器(DC-DCコンバータ一体型)、スバル プラグイン ステラにインバータや大容量DC-DCコンバータを納入しており電気自動車の中と外からサポートしています。

太陽光発電や蓄電池とのシステム化も対応いたします。

HT

*Up grade****Under Development***

Sample : 2007 Apr. ~
 Mass production : 2008 Apr. ~

USE	: HEV inverter , Automotive
Rated voltage	: 63 - 450V
Operating temperature	: -40 - 125 deg-C
Endurance	: 125 deg-C 5000h

Up Grade point

Newly developed electrolyte is used in this new product. As a result, endurance is increased from 2000h to 5000h. Simultaneously, the low temperature ESR characteristic (-40C ESR at 400V product 10kHz) is reduced by 1/10 compared to current product.

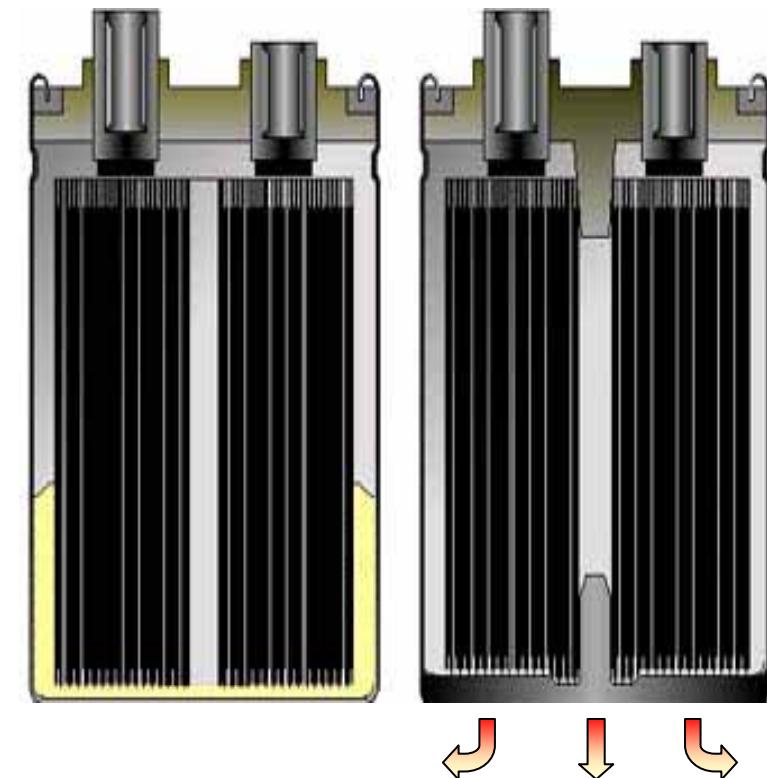

Strong point

Requests for high temperature ratings (ex. 90→105→125°C) will increase in the near future for HEV inverter capacitors. For a dielectric of 125°C, film capacitor use PET film, but it is difficult to guarantee 500V or more using this material. If 2 pcs of our HT series are used in series, the HT series can be used in 900V applications.

Stable high vibration resistance and high heat radiation at high temperature is attained by using "compound less" construction.

Other capacitor makers do not have this!.

Speed & Flexibility

nichicon

面向EV車顧客尼吉康長野品-螺紋型端子型電容單元

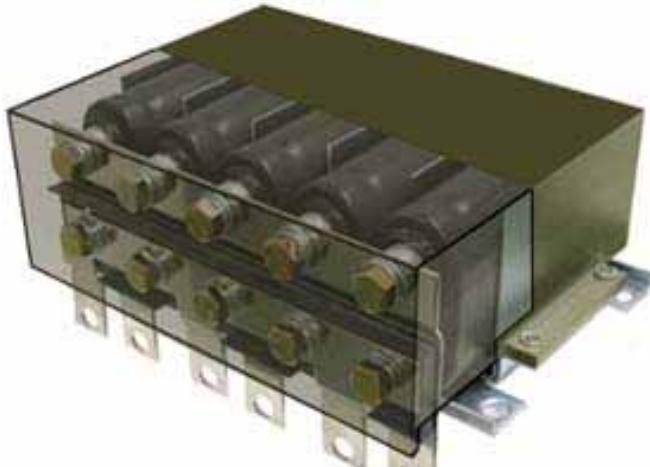

Concept Modular design which attains unification with a bus bar and bracket by using a flat type capacitor as the main technology.

Effect This module contributes to a high density, low profile module design which contributes to a reduction in required space and total cost.

High-density design

Under Development

For HEV 600V1250uF Module
(Flat type 5Pcs W140xD110xH55)

Low profile design

Under Development

For HEV 450V1000uF Module
(Flat type 3P W150xD110xH31)

Other capacitor makers do not have this!.
